BS EN 61373:2010 Compliance Declaration

Dated: 2025-03-25

Southco is dedicated to serving our customers with high quality engineered access hardware solutions, while protecting the environment and meeting applicable regulatory requirements. For the most up to date information, or to download regulatory or compliance documents for any Southco product, please search by part number, or visit the resource section of our website.

This declaration certifies Southco part number E3-57-85 complies with the requirements of the British/European Standard BS EN 61373:2010 concerning the demonstrated ability of the equipment under test to withstand the type of environmental vibration conditions normally expected for railway vehicles.

This standard pertains to equipment attached to the main structure of the vehicle and/or components mounted thereon. It is not intended to test equipment which forms part of the main structure. It is not intended to represent a full life test. However, the test conditions are sufficient to provide some reasonable degree of confidence that the equipment will survive the specified life under service conditions.

The Southco part's vibration and shock performance are categorized by parameters such as Functional Random Test, Simulated Long-life Test, and Shock Testing.

Certification is limited to parts as produced by Southco. No warranty is made for parts that have been further processed by any party, or stored in uncontrolled environments.

For additional compliance information not addressed here, or on our website above, please contact our global compliance team at techsupport@southco.com.
